I Wayne,

Sorry I missed you at Factory Butte on Tuesday. I understand you had mechanical problems. I waited at the site for you for a little while, but not too long.

I looked all around the site and did not see any new disturbances. The site looks the same as it did a couple years ago when I was last there; i.e., there is a small (5 or 6 foot long by 2 feet high) unauthorized cut at the top of the soil blanket that we pushed up against the highwall on the west side of the old coal mine pit, in 1984. Looks like the cut was made using hand tools. I don't know if Mr. Jackson is responsible, or someone else. In any event the disturbance is small and I think it best not to let Mr. Jackson, or anyone else, back onto the site. I recommend that you go ahead and retire Jackson's, Humic Shale, Small Mine Permit and bond. Thanks.
